

Women's Ministry Fall Kick-Off

Come Tuesday September 16th

These Templates Are Easy To Use!

The poster is an interactive Word.doc that opens directly onto your computer screen, where you will be able to enter your unique event information. If you have your own photos, fine -- if not, use ours. If your text is longer, reduce the font, otherwise, go with the preprogrammed font. The poster template produces a top quality, camera-ready poster. If you save the original to your computer, and then save revisions as you go, it's easy!
